No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1989 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

CONTENTS OF VOLUME 270

NUMBER 1, APRIL, 1989

INVITED PAPER

Molecular Aspects of the Adenine Nucleotide Carrier from Mitochondria
Martin Klingenberg 1

COMMUNICATIONS

Inositol Polyphosphate Production and Regulation of Cytosolic Calcium during the Biphasic Activation of Adrenal Glomerulosa Cells by Angiotensin II
Tamas Balla, William P. Hausdorff, Albert J. Baukal, and Kevin J. Catt 398

Biomimetic Oxidation of Nonphenolic Lignin Models by Mn(III): New Observations on the Oxidizability of Guaiacyl and Syringyl Substructures
Kenneth E. Hammel, Paul J. Tardone, Mark A. Moen, and Lisa A. Price 404

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

Inhibition of Cardiac Sarcoplasmic Reticulum Ca^{2+}-ATPase Activity by Menadione
M. Floreani and F. Carpenedo 33

Damage to Protein Synthesis Concurrent with Lipid Peroxidation in Rat Liver Slices: Effect of Halogenated Compounds, Peroxides, and Vitamin E
Cesar G. Fraga, Rosario Zamora, and Al L. Tappel 84

Vanadate-Dependent NAD(P)H Oxidation by Microsomal Enzymes
David W. Reif, Roger A. Coulombe, Jr., and Steven D. Aust 137

An Investigation of the Electrochemical Cycle of Bacteriorhodopsin Analogs with the Modified Ring
Lel A. Drachev, Alexander L. Drachev, Lina N. Chekulaeva, Rimma P. Evstigneeva, Andrey D. Kaulen, Lyubov V. Khitrina, Andrey A. Khodonov, Zvetana R. Lazarova, and Boris I. Mitsner 184

ENZYME MECHANISMS AND METABOLISM AND COENZYMES

Does Glyceraldehyde Enter Pancreatic Islet Metabolism via Both the Triokinase and the Glyceraldehyde Phosphate Dehydrogenase Reactions? A Study of These Enzymes in Islets
Michael J. MacDonald 15

Inhibition of Glyceraldehyde-3-phosphate Dehydrogenase by Pentalenolactone: Kinetic and Mechanistic Studies
David E. Cane and Jae-Kyung Sohng 50

Purification and Properties of Ornithine Carbamoyl Transferase from Liver of *Squalus acanthias*
Xiaofeng Xiong and Paul M. Anderson 198

Tryptophan 2,3-Dioxygenase Activity in Rat Skin
Junko Naito, Isao Ishiguro, Yoichi Nagamura, and Hisamitsu Ogawa 236

Stimulation by Fibrinogen of the Amidolytic Activity of Single-Chain Tissue Plasminogen Activator
Tetsumei Urano, Vesna S. deSerrano, Shoko Urano, and Francis J. Castellino 356

Biosynthesis of 9-β-D-Arabinofuranosyladenine: Hydrogen Exchange at C-2′ and Oxygen Exchange at C-3′ of Adenosine *Robert J. Suhadolnik, Somchai Pornbanlualap, Joseph M. Wu, David C. Baker, and Anna K. Hebbler* 363
Stereospecific 2′-Amination and 2′-Chlorination of Adenosine by *Actinomadura* in the Biosynthesis of 2′-Amino-2′-deoxyadenosine and 2′-Chloro-2′-deoxycoformycin *Robert J. Suhadolnik, Somchai Pornbanlualap, David C. Baker, Kamal N. Tiwari, and Anna K. Hebbler* 374
Purification of Prosthetically Intact Sulfite Oxidase from Chicken Liver Using a Modified Procedure *Cary A. Kipke, John H. Enemark, and Roger A. Sunde* 383

GLYCOPROTEINS AND GLYCOLIPIDS

Studies on Asparagine-Linked Protein Glycosylation in Differentiating Skeletal Muscle Cells *Karen R. Miller, Charles N. Remy, and P. Blaise Smith* 242
Structural Study of the Sugar Chains of Human Platelet Thrombospondin *Kiyoshi Furukawa, David D. Roberts, Tamao Endo, and Akira Kobata* 302

LIPIDS AND LIPID MEDIATORS: METABOLISM, REGULATION, AND FUNCTION

Phosphatidylinositol Modulates the Response of Calmodulin-Dependent Phosphatase to Calmodulin *Shengli Huang, Dennis Merat, and Wai Yiu Cheung* 42
Ethanol Interferes with Collagen-Induced Platelet Activation by Inhibition of Arachidonic Acid Mobilization *Raphael Rubin* 99

MEMBRANES, CELL SURFACES, AND RECEPTORS

Characterization of the Maturation-Associated Galactose Oxidase-Sensitive Glycoproteins of Rat Caudal Sperm Plasma Membrane and Epididymal Fluid *Barbara Fudem Goldin, Pamela J. Voulalas, and George A. Orr* 208
Escherichia coli K99 Binds to *N*-Glycolylsialoparagloboside and *N*-Glycolyl-GM3 Found in Piglet Small Intestine *Mamoru Kyogashima, Victor Ginsburg, and Howard C. Krivan* 391

MOLECULAR BIOLOGY, GENE EXPRESSION AND DEVELOPMENTAL BIOCHEMISTRY

Effect of Spermidine on the Development of Bacteriophage SP6 *Mukesh Verma* 77
Expression of the α-Fetoprotein Gene in Adult Rat Liver *Yu-Jui Yvonne Wan and Janice Yang Chou* 267

OXYGENASES, MICROSOMES, AND P450 REACTIONS

Antibodies Targeted against Hypervariable and Constant Regions of Cytochromes P450IIB1 and P450IIB2 *Franz Oesch, David J. Waxman, Joseph J. Morrissey, Walther Honscha, Wolfgang Kissel, and Thomas Friedberg* 23
Selective Potent Restriction of P450b- But Not P450e-Dependent 7,12-Dimethylbenz[*a*]anthracene Metabolism by the Microsomal Environment *Maro Christou, Martin J. Mitchell, Marina C. Jovanovich, Neil M. Wilson, and Colin R. Jefcoate* 162
Kinetic Deuterium Isotope Effects on Deamination and N-Hydroxylation of Cyclohexylamine by Rabbit Liver Microsomes *Hideo Kurebayashi* 320
Interaction of Hexachlorobenzene with the Receptor for 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin *in Vitro* and *in Vivo*. Evidence that Hexachlorobenzene Is a Weak Ah Receptor Agonist *Mark E. Hahn, Joyce A. Goldstein, Patricia Linko, and Thomas A. Gasiewicz* 344

PHYSICAL BIOCHEMISTRY, MACROMOLECULAR STRUCTURE AND FUNCTION

Numerical and Experimental Demonstrations of the Need for Caution in the Use of Zonal Gel Chromatography for Characterizing Ligand Interactions with Small Acceptors *John R. Cann, A. G. Appu Rao, and Donald J. Winzor* 173

PLANT MOLECULAR BIOLOGY, BIOCHEMISTRY, AND PHOTOSYNTHESIS

The Amino Acid Sequence of Cytochrome c_{553} from *Microcystis aeruginosa* *Cathleen L. Cohn, Mark A. Hermodson, and David W. Krogmann* 219

The Amino Acid Sequence of Low-Potential Cytochrome c_{550} from the Cyanobacterium *Microcystis aeruginosa* *Cathleen L. Cohn, James R. Sprinkle, Jawed Alam, Mark Hermodson, Terry Meyer, and David W. Krogmann* 227

Aspartate Aminotransferase from *Panicum maximum* Jacq. var. *trichoglume* Eyles, a C_4 Plant: Purification, Molecular Properties, and Preparation of Antibody *Tatsuo Numazawa, Shigehiro Yamada, Toshiharu Hase, and Tatsuo Sugiyama* 313

PROTEASES, PROTEIN TURNOVER, AND POST-TRANSLATIONAL PROCESSING

Cytochrome *c* Peroxidase Activity of a Protease-Modified Form of Cytochrome *c*-552 from the Denitrifying Bacterium *Pseudomonas perfectomarina* *Claude Marini Denariaz, Ming-Yih Liu, William J. Payne, Jean LeGall, Leah Marquez, H. Brian Dunford, and Joseph Van Beeumen* 114

A Peptidyl Dipeptidase-4 from *Pseudomonas maltophilia:* Purification and Properties *Yamuna Dasarathy, Joanne Stevens, Barry L. Fanburg, and Joseph J. Lanzillo* 255

The Properties of Peptidyl Diazoethanes and Chloroethanes as Protease Inactivators *Peter Wikstrom, Heidrun Kirschke, Stuart Stone, and Elliott Shaw* 286

Effects of Puromycin and Hydroxynorvaline on Net Production and Intracellular Degradation of Collagen in Human Fetal Lung Fibroblasts *Frank A. Barile, Zafar-E-Alam Siddiqi, Catherine Ripley-Rouzier, and Robert S. Bienkowski* 294

PROTEIN STRUCTURE AND FUNCTION

The Binding of β-Glycerophosphate to Glycogen Phosphorylase *b* in the Crystal *N. G. Oikonomakos, K. R. Acharya, A. E. Melpidou, D. I. Stuart, and L. N. Johnson* 62

Complete Amino Acid Sequence of Chicken Liver Acyl Carrier Protein Derived from the Fatty Acid Synthase *Wei-Yong Huang, James K. Stoops, and Salih J. Wakil* 92

Hydrogen-1 Nuclear Magnetic Resonance Studies of Staphylococcal Nuclease Variant H124L: pH Dependence of Histidines and Tyrosines *Masanobu Chinami and Masahisa Shingu* 126

Carboxypeptidase Inhibitors from *Ascaris suum:* The Primary Structure *Gene A. Homandberg, Robert D. Litwiller, and Robert J. Peanasky* 153

Identification of Histidyl Peptide Labeled by 2-(4-Bromo-2,3-dioxobutylthio)adenosine 5′-Monophosphate in an ADP Regulatory Site of Glutamate Dehydrogenase *Surendra P. Batra, Richard H. Lark, and Roberta F. Colman* 277

Purification and Characterization of an Inducible Cysteine Proteinase Inhibitor from Submandibular Glands of Isoproterenol-Treated Rats *Gurrinder S. Bedi* 335

REGULATION OF METABOLISM AND OF ENZYME ACTION

Chondrocyte Activation by a Putative Interleukin-1 Derived from Lapine Polymorphonuclear Leukocytes
S. Watanabe, H. I. Georgescu, D. B. Kuhns, and C. H. Evans 69

Carbonic Anhydrase in Guinea Pig Skeletal Muscle Mitochondria
Bayard T. Storey, Lydia C. Lin, Betty Tompkins, and Robert E. Forster II 144

Regulation of Rat Liver Microsomal Glutathione *S*-Transferase Activity by Thiol/Disulfide Exchange *Yoko Aniya and M. W. Anders* 330

NUMBER 2, MAY 1, 1989

COMMUNICATIONS

Adrenoleukodystrophy: Impaired Oxidation of Fatty Acids Due to Peroxisomal Lignoceroyl-CoA Ligase Deficiency
O. Lazo, M. Contreras, A. Bhushan, W. Stanley, and I. Singh 722

Effect of Nitrous Oxide Inactivation of Vitamin B_{12}-Dependent Methionine Synthetase on the Subcellular Distribution of Folate Coenzymes in Rat Liver
Donald W. Horne, Dewain Patterson, and Robert J. Cook 729

BIOLOGICAL OXIDATIONS AND BIOENERGETICS

The Role of Carotenoids in Preventing Oxidative Damage in the Pigmented Yeast, *Rhodotorula mucilaginosa*
Margo M. Moore, Michael W. Breedveld, and Anne P. Autor 419

Metabolism of Vitamin D_2 in Pig Liver Homogenates: Evidence for a Free Radical Reaction *G. W. Engstrom and N. J. Koszewski* 432

Cytoskeletal Alterations in Human Platelets Exposed to Oxidative Stress Are Mediated by Oxidative and Ca^{2+}-Dependent Mechanisms
Francesca Mirabelli, Alberto Salis, Mario Vairetti, Giorgio Bellomo, Hjördis Thor, and Sten Orrenius 478

DNA Alterations Induced by the Carbon-Centered Radical Derived from the Oxidation of 2-Phenylethylhydrazine *Luciana C. C. Leite and Ohara Augusto* 560

Capsaicin and Its Analogs Inhibit the Activity of NADH-Coenzyme Q Oxidoreductase of the Mitochondrial Respiratory Chain
Yoshiharu Shimomura, Teruo Kawada, and Masashige Suzuki 573

Synergistic Inhibition of Oxidation in Dispersed Phosphatidylcholine Liposomes by a Combination of Vitamin E and Cysteine
Tadashi Motoyama, Masayuki Miki, Makoto Mino, Mareyuki Takahashi, and Etsuo Niki 655

Mitochondrial Damage as a Mechanism of Cell Injury in the Killing of Cultured Hepatocytes by *tert*-Butyl Hydroperoxide
Naohiko Masaki, Marlene E. Kyle, Ada Serroni, and John L. Farber 672

Effect of Citreoviridin and Isocitreoviridin on Beef Heart Mitochondrial ATPase
S. Fusun Sayood, Hongsuk Suh, Craig S. Wilcox, and S. M. Schuster 714

ENZYME MECHANISMS AND METABOLISM AND COENZYMES

Reactions of Phosphonate Analogs of Pyridoxal Phosphate with Apo-aspartate Aminotransferase *Retsu Miura, Carol M. Metzler, and David E. Metzler* 526

Steady-State Kinetic Studies of the Metal Ion-Dependent Decarboxylation of Oxalacetate Catalyzed by Pyruvate Kinase
Dennis M. Kiick and Wm. Wallace Cleland 647
A Novel Biosynthesis of Medium Chain Length α-Ketodicarboxylic Acids in Methanogenic Archaebacteria *Robert H. White* 691
Conversion of Canavanine to α-Keto-γ-guanidinooxybutyrate and to Vinylglyoxylate and 2-Hydroxyguanidine
Marsha M. Hollander, Allan J. Reiter, William H. Horner, and Arthur J. L. Cooper 698

GLYCOPROTEINS AND GLYCOLIPIDS

Characterization and Membrane Organization of β1 → 3- and β1 → 4Galactosyltransferases from Human Colonic Adnocarcinoma Cell Lines Colo 205 and SW403: Basis for Preferential Synthesis of Type 1 Chain Lacto-Series Carbohydrate Structures *Eric H. Holmes* 630

LIPIDS AND LIPID MEDIATORS: METABOLISM, REGULATION, AND FUNCTION

Studies on the Biosynthesis of Avermectins
Tom S. Chen and Edward S. Inamine 521
Fatty Acid Cyclooxygenase Activity Stimulated by Transforming Growth Factor-β in Mouse Osteoblastic Cells (MC3T3-E1)
Koji Sumitani, Terushige Kawata, Tanihiro Yoshimoto, Shozo Yamamoto, and Masayoshi Kumegawa 588
Interference of Electron Transport Inhibitors with Desaturation of Monogalactosyl Diacylglycerol in Intact Chloroplasts
Jaen Andrews, Hermann Schmidt, and Ernst Heinz 611

MEMBRANES, CELL SURFACES, AND RECEPTORS

Characterization of a Monoclonal Antibody to Guinea Pig Peritoneal Macrophages That Inhibits Phagocytosis of Unopsonized Zymosan: Structural and Functional Similarities of the Antigen to Human and Mouse CR3
Koichi Tamoto, Masahito Tada, Kaoru Hazeki, Toshihiko Kakinuma, and Yoki Mori 541
Possible Involvement of a 95-kDa Protein Phosphorylation in Phorbol 12-Myristate 13-Acetate-Induced Suppression of Zymosan Phagocytosis in Guinea Pig Macrophages
Kaoru Hazeki, Koichi Tamoto, Masahito Tada, and Yoki Mori 551

OXYGENASES, MICROSOMES, AND P450 REACTIONS

Purification of Two Isozymes of Rat Liver Microsomal Cytochrome P450 with Testosterone 7α-Hydroxylase Activity
Michael P. Arlotto, Denise J. Greenway, and Andrew Parkinson 441
Identification of Cytochrome P450a (P450IIA1) as the Principal Testosterone 7α-Hydroxylase in Rat Liver Microsomes and Its Regulation by Thyroid Hormones *Michael P. Arlotto and Andrew Parkinson* 458
Suppression in the Expression of a Male-Specific Cytochrome P450, P450-Male: Difference in the Effect of Chemical Inducers on P450-Male mRNA and Protein in Rat Livers
Miki Shimada, Norie Murayama, Kiyomi Yamauchi, Yasushi Yamazoe, and Ryuichi Kato 578

Expression of Rat Liver Heme Oxygenase Gene during Development
Jane H.-C. Lin, Patricio Villalon, John C. Nelson, and Nader G. Abraham 623
Selective Oxidation of Mitochondrial Glutathione in Cultured Rat Adrenal Cells and Its Relation to Polycyclic Aromatic Hydrocarbon-Induced Cytotoxicity
Einar Hallberg and Jan Rydström 662

PHYSICAL BIOCHEMISTRY, MACROMOLECULAR STRUCTURE AND FUNCTION

Bile Salt Micelle Can Sustain More Cholesterol in the Intermicellar Aqueous Phase than the Maximal Aqueous Solubility *Kazuo Chijiiwa and Minako Nagai* 472
Interactions Involved in Ovomucin Gel-Forming Properties: A Rheological–Biochemical Approach
Catherine Rabouille, Miguel A. Aon, and Daniel Thomas 495

PLANT MOLECULAR BIOLOGY, BIOCHEMISTRY, AND PHOTOSYNTHESIS

Protein Phosphorylation as a Mechanism for Regulation of Spinach Leaf Sucrose-Phosphate Synthase Activity
Joan L. A. Huber, Steven C. Huber, and Tom Hamborg Nielsen 681

PROTEIN STRUCTURE AND FUNCTION

Biochemical and Immunological Characterization of the Flagellar-Associated Regulatory Subunit of a Type II Cyclic Adenosine 5′-Monophosphate-Dependent Protein Kinase
Jill A. Horowitz, Pamela Voulalas, Wilma Wasco, Janet MacLeod, Marie-Christine Paupard, and George A. Orr 411
Homology of the D-Galactose-Specific Lectins from *Artocarpus integrifolia* and *Maclura pomifera* and the Role of an Unusual Small Polypeptide Subunit
N. Martin Young, Rosemary A. Z. Johnston, Arthur G. Szabo, and David C. Watson 596

REGULATION OF METABOLISM AND OF ENZYME ACTION

Vanadium(IV)-Stimulated Hydrolysis of 2,3-Diphosphoglycerate
Paul J. Stankiewicz 489
Purification, Immunoassay, and Tissue Distribution of Rat C_1-Tetrahydrofolate Synthase *William D. Cheek and Dean R. Appling* 504
Multiple Forms of Biliverdin Reductase: Modification of the Pattern of Expression in Rat Liver by Bromobenzene
Tian-Jun Huang, G. Michael Trakshel, and Mahin D. Maines 513
Bovine Lens Aldose Reductase: Identification of Two Enzyme Forms
Antonella Del Corso, Daniela Barsacchi, Marcella Camici, Donita Garland, and Umberto Mura 604
AUTHOR INDEX FOR VOLUME 270 734

NOTICE

The Subject Index for Volume 270 will appear in the December 1989 issue as part of a cumulative index for the year 1989.

Instructions to Authors[1]

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. **Short Communications** and **regular manuscripts** that contain new and significant information of general interest to workers in these fields are welcome. Sufficient detail must be included to enable others to repeat the work.

Short Communications offer a means of early publication of work of such importance that rapid publication is warranted. They should not exceed 15 double-spaced typed manuscript pages in length (including text, bibliography, tables, and figures). To expedite review and processing of communications, authors may send them directly to an Executive Editor most closely associated with the subject category of the communication. Communications sent to the Editorial Offices of the journal (see below) will be assigned to an Executive Editor.

Manuscripts should be written in clear, concise, and grammatical English and should be submitted in quadruplicate (one original and three photocopies), including four sets of original figures or good quality glossy prints, to:

Archives of Biochemistry and Biophysics
Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Failure to receive the required number of copies of the manuscript may delay review. All copies of halftone artwork *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

Gene sequences should be simultaneously submitted to a gene databank. Authors of papers describing new structure determinations are requested to submit to the Protein Data Bank all of the structural data required to validate the discussion, including both x-ray amplitudes and phases and the advised atomic coordinates.

Original papers only will be considered. ***Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. It is the responsibility of the corresponding author to obtain the agreement of all the coauthors of the manuscript prior to its submission to the journal.*** Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. The corresponding author will receive a decision letter from the Executive Editor. Revised manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Communications offer a means of early publication of work of such importance that rapid release is warranted. Normally they should not exceed 15 manuscript pages in length (including text, bibliography, tables, and figures). The review and printing of such papers will be expedited to provide earliest possible publication.

Form of Manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

---

[1] An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC–IUB rules and recommendations, and accepted abbreviations.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted. See the back cover for the listing of the Subject Areas.

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name and complete mailing address (and telephone number if possible) of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet: footnotes to tables should be identified by superscript lowercase italic letters (^{a,b}, etc.) and placed at the bottom of the table.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single-spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. They should be planned to fit the proportion of the printed page (5.5 × 8 in.; column width, 2.6 in.) and submitted no larger than 8.5 × 11 in. Lettering on drawings should be of professional quality or generated by *high-resolution* computer graphics and should be large enough (10–12 points) to take a reduction of 50–60%. Drawings should be made with India ink on tracing linen, smooth surface white paper, or Bristol board. Alternatively, *high-quality* computer graphics may be acceptable. Graph paper, if used, should be ruled in blue. Glossy prints of figures properly prepared are acceptable. Illustrations in color can be accepted only if the authors defray the cost.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1985. Please note the following examples.

1. Kiss, Z., Deli, E., and Kuo, J. F. (1988) *Arch. Biochem. Biophys.* **265,** 38–42.
2. Stein, W. D. (1986) Transport and Diffusion across Cell Membranes, Academic Press, San Diego, CA.
3. Magnani, J. L., Spitalnik, S. L., and Ginsburg, V. (1987) *in* Methods in Enzymology (Ginsburg, V., Ed.), Vol. 138, pp. 195–207, Academic Press, San Diego, CA.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.

ANNOUNCEMENT

Walter J. Johnson Prize

For the Encouragement of Postdoctoral Research

The Board of Directors of Harcourt Brace Jovanovich, Inc., has established the Walter J. Johnson Prize to be awarded to a deserving individual or individuals having recently completed doctoral studies in the life sciences. The award was established in recognition of Mr. Walter J. Johnson, founder of Academic Press (a division of Harcourt Brace Jovanovich), who has engaged in a lifelong dedication to excellence in scientific publishing. The editorial administrators of three Academic Press journals have been vested with the authority to select the recipients of the Walter J. Johnson Annual Prize: *Archives of Biochemistry and Biophysics, Experimental Cell Research,* and *Journal of Molecular Biology.*

A prize of $10,000 will be awarded by the Editorial Committee of *Archives of Biochemistry and Biophysics* every three years (next in the spring of 1990) to one or more individuals who have recently completed their doctoral studies in the life sciences.

The following guidelines will apply in the selection of recipients of this award:

1. The nomination should be based on the quality of a paper published in *Archives of Biochemistry and Biophysics* during the preceding three years. The nominee must have been the first-listed author.
2. The nominee should have received his/her Ph.D. or M.D. no more than five years prior to the publication date of the article.
3. The Prize may be awarded to one nominee or divided among several nominees.
4. Nominations should be made in writing to the Chairman of the Editorial Committee by a member of the Editorial Board of *Archives of Biochemistry and Biophysics.* Nominations must be submitted by December 31, 1989.
5. Selection will be made by a Committee of Executive Editors of *Archives of Biochemistry and Biophysics.*
6. Awards will be presented next in the spring of 1990 during the dinner meeting of the Editorial Board of *Archives of Biochemistry and Biophysics* held during the Annual Meeting of the ASBMB.
